SUMMARY

Recent Computer Engineering graduate with hands-on experience building Python applications, AI agents, and backend systems using Flask and PostgreSQL. Creator of Rohith Builds — a deployed AI-powered learning platform with 100 structured lessons, autonomous job scraper (LinkedIn, Naukri, Indeed), and a Groq-powered AI tutor. Passionate about building real systems that teach, automate, and scale.

WORK EXPERIENCE

Python Developer (Trainee) — Lionix LLP

April 2026 – Present

- Participated in structured Python training and independently built full-stack features including PostgreSQL database schemas, REST APIs, and admin dashboards
- Debugged and resolved full-stack integration issues between React frontend and Node.js/Express backend for a live client project
- Designed and created 14 PostgreSQL tables using Neon cloud database, fixed authentication flow (signup/login), and made the full website dynamic within 48 hours

AI/ML Intern — Nextopson

Jan 2025 – June 2025

- Engineered a real-time NSFW detection and room classification system with TensorFlow.js, enabling client-side inference at ~10 FPS with zero backend cost
- Fine-tuned MobileNetV2 with data augmentation and preprocessing, achieving 90% validation accuracy on room classification and 87% on NSFW detection
- Deployed models via a backend API, cutting rollout time by 50% and optimizing inference latency by 30%

PROJECTS

Rohith Builds — AI Learning Platform

Python, Flask, PostgreSQL, Groq, Render | [Live](#) | [GitHub](#)

- Built and deployed a full-stack learning platform with 100 structured lessons, Rohi AI tutor (Groq LLM), 220+ prompt vault, and automated email system
- Engineered autonomous job scraper aggregating LinkedIn, Naukri, and Indeed using Groq AI (Llama-3.3-70b) to filter and auto-insert 53+ junior developer roles into PostgreSQL with deduplication and 4-day freshness filtering
- Built admin dashboard with Chart.js analytics, stuck student retention system, AI lesson generator, Reddit reply assistant, and Groq API key rotation fallback
- Growing brand **@rohith_builds**: daily Python→AI content series with 10K+ views, automated till September 2026

Autonomous AI Research Agent

Python, Groq, DuckDuckGo API, Flask, Render | [GitHub](#)

- Built a multi-step autonomous agent that researches topics, synthesizes information, and returns structured answers using Groq LLM tool calling
- Integrated web search tools, custom prompt engineering, and deployed via Flask on Render with real-time streaming responses

NSFW Shield — AI Content Moderation

TensorFlow.js, MobileNet, JavaScript, Vercel | [Live](#) | [GitHub](#)

- Browser-based ML application with 87% NSFW detection accuracy — zero server uploads, fully client-side inference at ~100 images/min
- Implemented drag & drop interface, real-time prediction, and confidence scoring; deployed on Vercel

Internal Marks Management System

Node.js, Express.js, MySQL, JWT | [GitHub](#)

- Secure role-based academic platform with JWT authentication, RBAC, real-time dashboards, and CSV export functionality
- Designed efficient database schemas with audit trails, eliminating manual errors and improving data accuracy

TECHNICAL SKILLS

- **Languages:** Python, SQL, JavaScript, Java
- **AI & LLMs:** Groq API, LLM Integration, Prompt Engineering, AI Agents, RAG basics, TensorFlow, Keras, Transfer Learning
- **Backend:** Flask, Django, Node.js, Express.js, REST APIs, JWT, RBAC
- **Databases:** PostgreSQL, MySQL, Query Optimization, Schema Design, Stored Procedures, Neon
- **Tools:** Git, GitHub, Render, Vercel, Postman, Jupyter Notebooks

CERTIFICATIONS

AWS Educate: Machine Learning Foundations (Aug 2025) | AWS Educate: Intro to Generative AI (Aug 2025) | IBM: Python 101 for Data Science (Jan 2025) | IBM: Getting Started with Artificial Intelligence (Sep 2024) | Cisco: Python Essentials 1 (Apr 2025)

HACKATHONS

Salesforce & 1M1B Sustainability Hackathon

Oct 2024

- Designed AI-driven autonomous boat for river/ocean cleanup using computer vision and autonomous navigation; delivered pitch to judges

EDUCATION

B.Tech in Computer Engineering (Software Engineering)

2022 – 2026 | CGPA: 7.75

Balaji Institute of Technology & Science, Warangal

Intermediate (MPC) — SR Junior College, Warangal (2020–2022)

CGPA: 8.4

SSC — ST Ann’s High School, Warangal |
